Profile

I am an experienced Fullstack Engineer (FE) with a track record in building large-scale web services and modern applications. My expertise encompasses a range of technologies such as **Vue.js/Nuxt**, **React**, **Jest**, **Vitest**, **Typescript**, **Express (Node.js)**, **Docker**, **Prisma, Casl,Cypress, Postgres, Firebase, MongoDb** and more. I specialize in developing software products designed for handling extensive data and traffic, adhering to agile methodologies and industry standards. Committed to open solutions, I prioritize modularity, component reusability, and consistent performance. I collaborate effectively to uphold the highest quality standards, creating visually appealing and efficient web applications through my proficiency in frontend frameworks, backend technologies, containerization, and design tools.
